APPLICATIONS

This commercial-grade series is ideal for highways, city streets, large parking lots and area lighting. It comes with a wide choice of configurations, lumen outputs, pole heights, and it's optimized for high efficiency and

DESCRIPTION

SATELIS meets the lighting requirements for major roads and highways. Equipped with more powerful solar panels and higher capacity lithium battery packs to ensure battery run time, Satelis is the spec-grade LED solar lighting solution for most commercial applications.

CERTIFICATION DATA

ORDERING INFORMATION

75=75W 15000 Lumens 4=4000K BR=Bronze 5=5000K 60=60AH 60=90AH	SERIES	WATTAGE	COLOR TEMPERATURE	MOUNTING OPTIONS	FINISH	BATTERY CAPACITY
	STLSTD =SATELIS		4 =4000K 5 =5000K	SF =Slip Fitter	,	(only for SATELIS 50W) 60=60AH

SPECIFICATION FEATURES

Powerful Panel & Powerful Lighting

- 2*130W Dual Panels and 2*75W Dual lighting head option
- \cdot 15,000LM at 200 LM/W highest efficiency in the industry
- Remote control included with one-button mode settings

Modular & Customizable Concept

- Modular battery box with fast hooking design and IP68 underground options
- Top mounting or under mounting panel options
- Reduce the construction time for building projects
- \cdot TYPE III distribution comes standard. TYPE II and
- TYPE V are also available.

Longer Life & Heavy Duty

- \cdot Grade A LifePO₄ Battery Pack up to 25V*90AH, 2000+
- full Charging Cycles
- LEVEL 12 Wind Test

Standardized Lighting Design

- · Illumination where you need it with scheduled dimming
- Meets IES standards for road illumination
- Solar clean energy solution that also meets street and area light compliances

INSTALLATION ACCESSORIES

SLIP FITTER

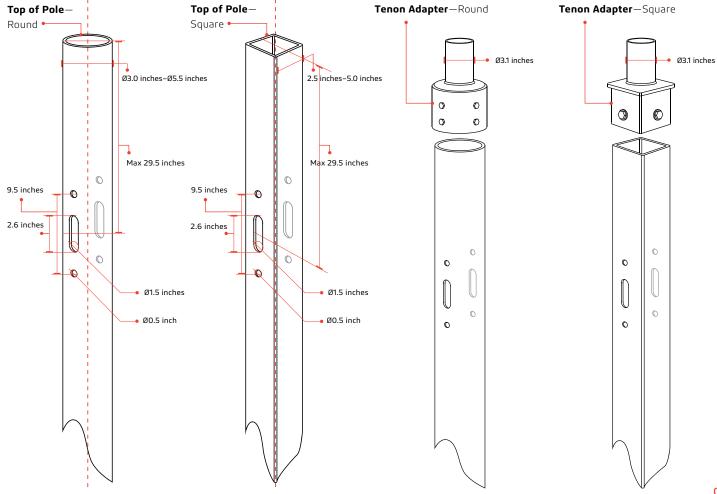

POLE ASSEMBLY

Create 2 holes (diameter 0.5 inch) in the middle of pole, create 1 hole (diameter 1.5 inch, 2.6 inch long) between the 2 holes.

TENON ADAPTER

If your round pole size is over 3.1 inches, or you need a square pole, please contact the pole manufacturer for the tenon adapter.

The solar charge in a battery pack won't last forever. The off-grid system relies on stored solar energy for autonomy. Angling your solar panels properly can boost the power intake of your solar lighting system. You want to angle your solar panels at a tilt based on the area's latitude.

Tip

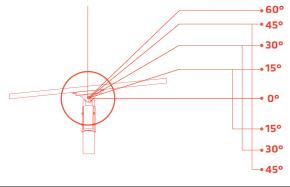

You can increase the tilt 15° in the winter or decrease 15° in the summer. In this way you can get the maximum sunlight to recharge the battrey.

REMOTE CONTROLS est 1. On/Off 2. Connect/Test 3. 40%~100% Motion 4. 20%~80% Motion Sensor Mode Sensor Mode (Default) 5. Night Owl Mode 6. Early Bird Mode 100% 70% 7. 100% Constant Mode 8.70% Constant Mode 9.40% Constant Mode 40% 10. Timer Mode Disabled 11. Timer Mode 4 Hours 12. Time Mode 8 Hours

When using the remote for the first time, please remove the plastic piece at the bottom to make the remote turn on.

The range of the remote control to the indicator is 16ft (Day time) to 33ft (Night time). Because the sunlight will impact the signal of the remote control, we suggest our users to setup the mode before they install the light.

1. On/Off

When off is selected, the light will stop working. The solar panel will not charge the battery and the battery will not supply electricity to the light.

2. Connect/Test

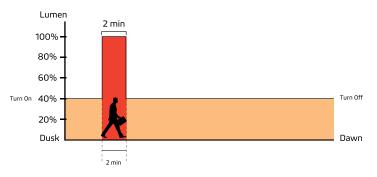

Remote control device can be connected with any lighting fixture, one at a time. To connect, press the button once. It also functions as a test button. To test, press the "Test" button once, the red light will indicate the fixture is charging, green light indicates that the fixture is operating. Testing lasts for 10 seconds, and then it goes back to the mode previously in use.

REMOTE CONTROLS

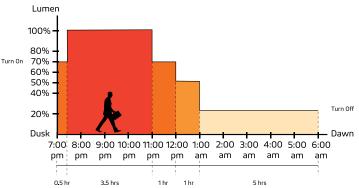

3. 40%~100% Motion Sensor Mode

Constant 40% brightness (turns on at dusk, turns off at dawn); 100% brightness turns on for 2 minutes when motion is detected.

5. Night Owl Mode

Changes as natural light decreases/increases (turns on at dusk); 70% brightness for 0.5 hour, 100% brightness for 3.5 hours, 70% brightness for 1 hour, 50% brightness for 1 hour, 20% brightness for 5 hours (turns off at Dawn).

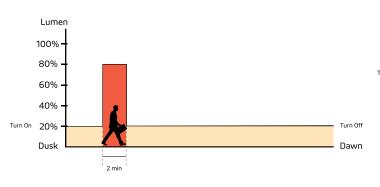

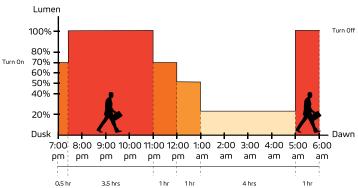

4. 20%~80% Motion Sensor Mode (Default)

Constant 20% brightness (turns on at dusk, turns off at dawn); 80% brightness turns on for 2 minutes when motionis detected.

6. Early Bird Mode

Changes as natural light decreases/increases with increased brightness near dawn for early risers (turns on at dusk); 70% brightness for 0.5 hour, 100% brightness for 3.5 hours, 70% brightness for 1 hour, 50% brightness for 1 hour, 20% brightness for 4 hours, 100% brightness for 1 hour (turns off at Dawn).

(IAP) Intelligent Adaptive Program Battery Control Technology

In order to extend the off-grid autonomy of the SATELIS under shady trees, heavy rain, and thick clouds, our controllers now integrate an adaptive smart control feature to actively track battery capacity and adjust light output accordingly. Before integrating this feature, selecting a light output percentage on the remote would yield an accurate percentage of max LED brightness. Now with (IAP), the controller actively monitors the battery and regulates the electrical current to the LEDs. The controller makes light output of the selected percentage on the remote relative to battery capacity rather than max LED output. This smart-control feature can increase our off-grid performance by up to 40%.

Important

Dusk and dawn time may be diffrent in other locations and seasons. The sensors of our products will follow the light patterns of where it is installed. The time period shown in the chart above is just an example to help you understand the different lighting modes only.

REMOTE CONTROLS

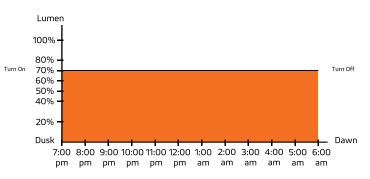

7. 100% Constant Mode

100% brightness from dusk to dawn.

8.70% Constant Mode

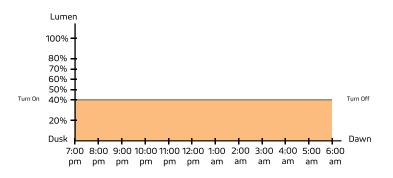

70% brightness from dusk to dawn.

9.40% Constant Mode

40% brightness from dusk to dawn.

10. Timer Mode Disabled

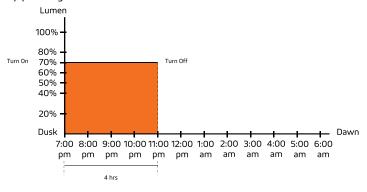

Press this button to turn off Timer Mode; settings revert back to before Timer Mode was last activated.

REMOTE CONTROLS

11. Timer Mode 4 Hours

This is an additional mode which can work with any other modes. For example: press this button at any time after you turn on 70% Constant Mode. If the light turns on at 7pm at dusk, it will turn off at 11pm. It will repeat the same schedule hereafter until it is canceled by pressing Timer Mode Disabled.

12. Time Mode 8 Hours
