70742	SKFHBPWG- Wire Guard for HighMax HighBay Acrylic Fixture	16.5" Diameter

* MaxLite, in its policy of continuous improvement, has recently evaluated its 200 Watt HighMax; and after conducting thermal improvement evaluations we can no longer recommend its use in a conical lens enclosed High Bay fixture. Although this represents a small specialized segment of sales, we can recommend the use of a conical lens when used with a 150 Watt HighMax, or a 150 Watt HighMax along with our reflector as an alternate, for various applications. New installations incorporating both a conical lens enclosed High Bay fixture and the 200 Watt HighMax will not be covered under our warranty. Any MaxLite High Bay fixture previously bought and installed with a MaxLite 200 Watt HighMax will still be subject to terms of our current warranty.
