APPLICATIONS

This economical, easily-installed, off-grid lighting solution is ideal for areas such as pathways, parking lots, landscaping, parks, schools, trails, or any remote locations that have no access to conventional power.

CERTIFICATION DATA

DESCRIPTION

Even in winter months, if sunlight is hitting a solar panel, it will generate electricity. Cold climates are actually optimal for solar panel efficiency. Contrary to common belief, heat diminishes the solar panel's electricity production. Soltech adopted unique, innovative battery technology to overcome the shortcomings of solar lighting system's cold weather performance. The super cold-tolerant battery technology in the SUNLIKE PRO 30W provides excellent low-temperature charge and discharge performance.

SPECIFICATION FEATURES

MPPT Controller

- Maximum Power Point Tracking (MPPT) is a technique for tracking and regulating the output energy from the solar panel to the battery.
- Measures the solar panel output voltage and current in real-time and continuously tracks the maximum power.
- Regulates the output voltage so that the system can always charge the battery with the maximum power.
- Significantly improves the solar system energy utilization rate, with a conversion efficiency up to 97%.
- Increases the solar system's charging efficiency by at least 20% compared to Pulse Width Modulation (PWM).

(IAP) Intelligent Adaptive Program Battery Control Technology

In order to extend the off-grid autonomy of the SUNLIKE PRO 30W under shade trees, heavy rain, and thick clouds, our controllers now integrate an adaptive smart control feature to actively track battery capacity and adjust light output accordingly. Before integrating this feature, selecting a light output percentage on the remote would yield an accurate percentage of max LED brightness. Activating the IAP, the controller actively monitors the battery and regulates the electrical current to the LEDs. The controller makes the light output of a selected percentage on the remote relative to battery capacity rather than max LED output. This smart-control feature can increase the fixture's off-grid performance by up to 40%.

SPECIFICATION FEATURES

50+ Hours Max Autonomy

- 691 WH battery capacity
- · Full self-charging time is less than 11 hrs
- Remote control included with one-button mode settings

Complete Universality

- · 5 different mounting options
- Designed for round pole, square pole and wall pack applications
- · Acts as a solar area light

High Brightness, Smart Power Consumption

- · 200lm/W—the highest efficiency in the industry
- \cdot PIR motion sensor and one-key automatic dimming
- Automatically switches to 40% energy saving mode during low battery levels

Longer Life

- · Grade A Superior Battery Pack, 2000+ full charging cycles
- · Lumileds 5050 LED chips

Greater Energy Production

- 52W Mono-Crystalline Solar Panel
- Adjustable angle for the fixture head allows maximum solar collection and self-cleaning of the solar panel surface

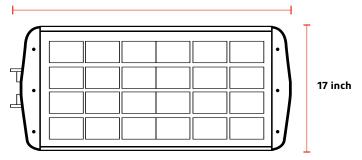

Low Maintenance Design

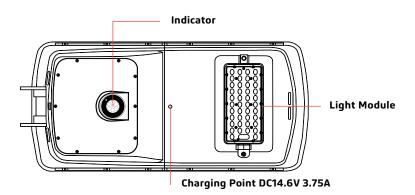

- Field-replaceable battery functionality via quick connections
- Die cast A380 aluminum fixture housing is rust-free
- · 10+ year warranty options for municipal utility projects

PRODUCT SIZE

36.0 inches

INSTALLATION ACCESSORIES

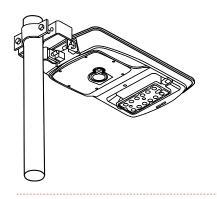

A. TRUNNION—Wall Mount

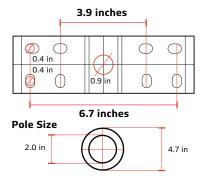

A-b. STLSTCP-WM-30W (for SUNLIKE PRO 30W)

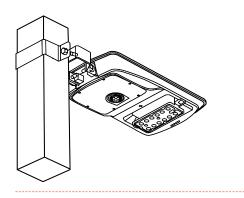

B. TRUNNION-Round

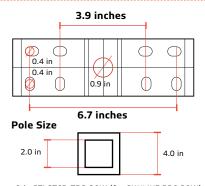

B-b. STLSTCP-TRR-30W (for SUNLIKE PRO 30W) works with 2.0 inches to 4.7 inches poles.

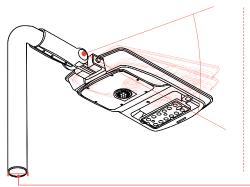

C. TRUNNION—Square

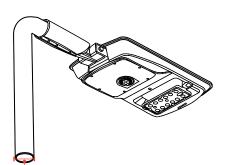

C-b. STLSTCP-TRS-30W (for SUNLIKE PRO 30W) works with 2.0 inches to 4.0 inches poles.

D. SLIP FITTER—Rotative AND STRAIGHT ARM

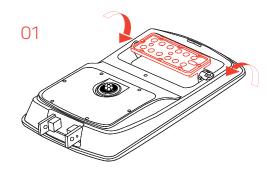

Pole Size For Slip Fitter And Straight Arm 1.8 in 2.4 in

The solar charge in a battery pack won't last forever. The off-grid system relies on stored solar energy for autonomy. Angling your solar panels properly can boost the power intake of your solar lighting system. You want to angle your solar panels at a tilt based on the area's latitude.

When using the remote for the first time, please remove the plastic piece at the bottom to make the remote turn on.

1. On/Off

When off is selected, the light will stop working. The solar panel will not charge the battery and the battery will not supply electricity to the light.

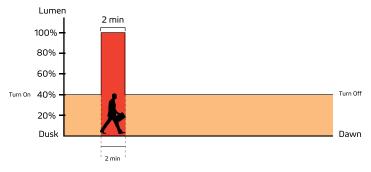

2. Connect/Test

Remote control device can be connected with any lighting fixture. When all cables are connected and solar panel detectes sunlight, the fixture will automatically turn on. To test, press the "Test" button once, the LED light will turn on to indicate the fixture has been turned on. During the day time, the indicator will slowly flashing red. That means the battery is charging.

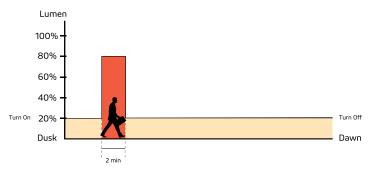

3. 40%~100% Motion Sensor Mode

Constant 40% brightness (turns on at dusk, turns off at dawn); 100% brightness turns on for 2 minutes when motion is detected.

4. 20%~80% Motion Sensor Mode (Default)

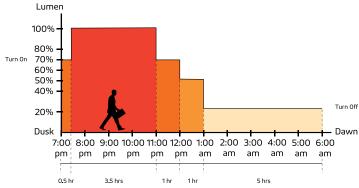

Constant 20% brightness (turns on at dusk, turns off at dawn); 80% brightness turns on for 2 minutes when motion is detected.

5. Night Owl Mode

Changes as natural light decreases/increases (turns on at dusk); 70% brightness for 0.5 hour, 100% brightness for 3.5 hours, 70% brightness for 1 hour, 50% brightness for 1 hour, 20% brightness for 5 hours (turns off at Dawn).

6. Early Bird Mode

Changes as natural light decreases/increases with increased brightness near dawn for early risers (turns on at dusk); 70% brightness for 0.5 hour, 100% brightness for 3.5 hours, 70% brightness for 1 hour, 50% brightness for 1 hour, 20% brightness for 4 hours, 100% brightness for 1 hour (turns off at Dawn).

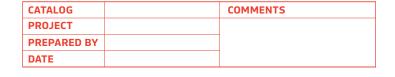

Important

Dusk and dawn time may be diffrent in other locations and seasons. The sensors of our products will follow the light patterns of where it is installed. The time period shown in the chart above is just an example to help you understand the different lighting modes only.

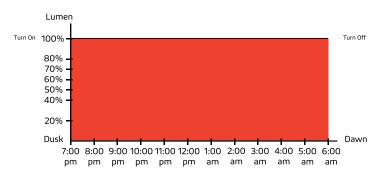

7. 100% Constant Mode

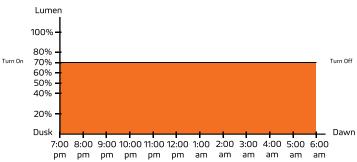

100% brightness from dusk to dawn.

8.70% Constant Mode

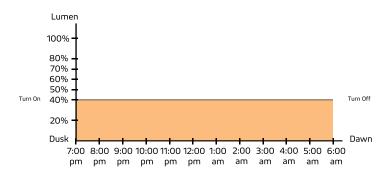

70% brightness from dusk to dawn.

9. 40% Constant Mode

40% brightness from dusk to dawn.

10. Timer Mode Disabled

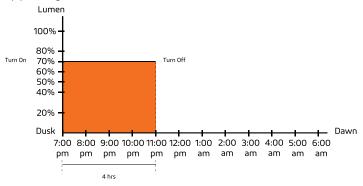

Press this button to turn off Timer Mode; settings revert back to before Timer Mode was last activated.

11. Timer Mode 4 Hours

This is an additional mode which can work with any other modes. For example: press this button at any time after you turn on 70% Constant Mode. If the light turns on at 7pm at dusk, it will turn off at 11pm. It will repeat the same schedule hereafter until it is canceled by pressing Timer Mode Disabled.

12. Time Mode 8 Hours

This is an additional mode which can work with any other modes. For example: press this button at any time after you turn on 70% Constant Mode. If the light turns on at 7pm at dusk, it will turn off at 3am. It will repeat the same schedule hereafter until it is canceled by pressing Timer Mode Disabled.

Important

Dusk and dawn time can vary for different locations and seasons. The sensors in our products will monitor the light levels where it is installed. The time period shown in the chart above is just an example to help you understand the different lighting modes.
